**Municipality of Anchorage** 

Port of Alaska Modernization Program (PAMP)

Repayment of Port Debt for the PAMP (Surcharge Concept)

Presentation by Ross Risvold to the Anchorage Port Commission Members

July 22, 2022

# **PAMP Cost by Phase**

| •               | Phase I  |  |  |
|-----------------|--|--|--|
|                 | <ul> <li>Petroleum and Cement Termin</li> </ul>    | al (PCT)<br>(To Be Completed Aug 2022) | \$ 228 million                                 |
| •               | Phase II A   |  |  |
|                 | <ul> <li>Administrative Building</li> </ul>        | (To Be Completed Dec 2023)             | \$ 11 million                                  |
|                 | <ul> <li>North End Stabilization Step 1</li> </ul> | (To Be Completed Dec 2024)             | <u>\$ 132 million</u>                          |
|                 | Total Phase II A                                   |  | \$ 143 million                                 |
|                 | Phase II B   |  | A SAME AND |
| - A Contraction | <ul> <li>Cargo Docks Replacement</li> </ul>        | (To Be Completed 2032)                 | \$ 1.103 Billion                               |
| •               | Phase II Total                                     |  | \$ 1.246 Billion                               |
| •               | Phase III  |  |  |
|                 | <ul> <li>Petroleum Terminal 2</li> </ul>           | (To Be Completed 2035)                 | \$ 184 million                                 |
| •               | Phase IV   |  |  |
|                 | <ul> <li>North End Stabilization Step 2</li> </ul> | (To Be Completed 2033)                 | \$ 134 million                                 |
| •               | Phase V  |  |  |
|                 | <ul> <li>Terminal 3 Demolition</li> </ul>          | (To Be Completed 2035)                 | <u>\$59 million</u>                            |
|                 |  | P                                      |  |
|                 | \$1.851 Billion                                    |  |  |
| Safe Sec        | cure Strong May                                    | yor Dave Bronson                       | Municipa                                       |

# **Policy Considerations**

1. Surcharge Concept

For recovery of PAMP marine terminal costs, using a per ton Surcharge on all commodities crossing the terminal

Recalibrates tariff rates for Petroleum and Cement Users beginning in 2023

- 2. All construction costs provided by Jacobs are as of March 15, 2022 and use 'mid-point of construction' escalation figures which include inflation
- 3. 30-year bonds were sold in 2020 for the PCT
- 4. Additional bonds are anticipated to be sold in late 2022
- 5. Tariff and Surcharge rates developed from this point forward assume bonds will be issued with a 40-year term
- 6. Tariff and Surcharge rates will be evaluated annually to reflect actual debt incurred
- 7. Cruise Ship activity is charged in the current Tariff 9.1

## Rate Design Surcharge Concept

### 1. The Surcharge Concept is based upon Commodities crossing the dock on a per ton basis

- A surcharge on all commodities will be used to generate the required revenue to support the debt needed to complete all phases of the PAMP
- Amounts to 82% of overall PAMP costs
  - Petro (Portion of Phase 1 and All of Phase 3)
  - Cement (Portion of Phase 1 only)
  - Cargo (Phase 2B only)

#### 2. The Remaining Cost is Assigned to all Port Users

- This portion of the PAMP benefits all Port users and the existing tariff will be adjusted and be applied to all port users to generate the required revenue to support the debt needed to complete the phases identified below
- Amounts to 18% of overall PAMP costs
  - Administrative Building (Phase 2A)
  - North End Stabilization (Phase 2A and Phase 4)
  - Demolition Terminal 3 (Phase 5)

## Rate Design Surcharge Concept

## Commodity Surcharge 2023 - 2027

| Commodity              | Cement        | Cargo         | Petro         |
|------------------------|---------------|---------------|---------------|
| Surcharge Per Ton 2023 | <u>\$1.26</u> | <u>\$4.70</u> | <u>\$1.31</u> |
| Surcharge Per Ton 2024 | <u>\$1.26</u> | <u>\$4.70</u> | <u>\$1.31</u> |
| Surcharge Per Ton 2025 | <u>\$1.26</u> | <u>\$4.70</u> | <u>\$1.31</u> |
| Surcharge Per Ton 2026 | <u>\$1.37</u> | <u>\$5.10</u> | <u>\$1.43</u> |
| Surcharge Per Ton 2027 | <u>\$1.45</u> | <u>\$5.38</u> | <u>\$1.50</u> |

#### **NOTES**

Surcharge to be effective January 1 each year and is evaluated every year

Surcharge includes a 5% Variance Factor for Forecasted Tonnage and is evaluated every year

## Rate Design - Surcharge Concept Implementation Schedule

- 1. Present to the Port Commissioners at Special Meeting (July 22)
- 2. Re-Draft Terminal Tariff No. 9.1 as No. 10.0
- 3. Post Notice of Port Commission Regular Meeting
- 4. Hold Port Commission Regular Meeting (Aug 10)
- 5. Port Commission Provides Recommendation to Assembly
- 6. Assembly May Hold a Public Work Session Regarding the Surcharge
- 7. Ordinance for new Tariff No. 10.0 is Introduced to the Assembly at a Regular Meeting
- 8. Assembly Holds Public Hearing for the Tariff Ordinance at a Regular Meeting
- 9. Surcharge Becomes Effective January 1, 2023, if approved

# Conclusion

As an Enterprise Fund and Nonregulated Utility – the Port of Alaska recovers all costs through user fees

Port infrastructure investment costs are typically recovered using a Surcharge method

The Surcharge Concept of assigning a Surcharge to a specific commodity (Petro, Cement, Cargo) coming across the dock is the policy recommendation of the Municipality

This Surcharge Concept, particularly the Uniform Surcharge for Cargo Terminal Users, has been vetted and reviewed by the Municipality's Bond Counsel, Special Port Counsel, Municipal Advisor and two independent advisors to the Port consistent with the Municipality's prior practice to support usage pricing and operations

The amount of the Surcharge will be reviewed annually

This Surcharge Concept is a fair, transparent, equitable and defendable Concept
