

Don Young **PORT of** **ALASKA**

Don Young Port of Alaska in Anchorage is a Municipality of Anchorage-owned and operated facility that handles half of all Alaska inbound freight – half of which is delivered to final destinations outside of Anchorage. It is:

- Intermodal transport hub that efficiently connects Alaska's primary marine, road, rail, pipeline and air cargo systems
- Department of Defense designated commercial strategic seaport that supports national defense missions across Alaska and around the world
- Anchorage's only foreign trade zone (FTZ no. 160) that extends U.S. Customs benefits to businesses and sites throughout the surrounding community
- Handles five times more inbound marine cargo than all other Southcentral ports combined

Don Young Port of Alaska serves deep-water vessels operating year-round. Matson Navigation of Alaska and TOTE Maritime Inc. each provide twice-weekly scheduled container ship service from Port of Tacoma. Domestic and foreign carriers provide routine bulk deliveries of petroleum products, cement, building materials and other commodities.

Facilities include:

- 4,500 feet dock frontage
- Three general cargo terminals with two 30-ton gantry cranes, one 40-ton gantry crane and roll-on/roll-off capability
- Three petroleum terminals with fifteen tide-compensating lines
- Dry- and break-bulk handling
- Two floating, small-vessel docks
- Dry-barge landing
- All berths dredged to at least 35-foot depth at mean lower low water
- Two miles of rail-spur connected to Alaska Railroad
- 125 acres of cargo handling and storage yard, 59,200 tons of bulk cement storage and 3.1 million barrels of liquid fuel storage

Alaska's primary inbound-cargo port

- Routinely handles containers, dry bulk, break bulk, petroleum products and cruise ships
- Located at Alaska's population center (54 percent of all state residents live within a one-hour drive of terminal and 75 percent of all Alaskans live on Anchorage-connected road system)
- Supported by hundreds of millions of dollars of public and private infrastructure
- Adjacent to Alaska Railroad's main cargo yard, two private barge terminals, Joint Base Elmendorf-Richardson (JBER) and Ted Stevens Anchorage International Airport (ANC)
- Regional pipeline connections to Nikiski, JBER and ANC
- Secured facility – open 24/7/365

Don Young Port of Alaska handles half of all Alaska inbound fuel and freight, which is distributed statewide and consumed by 90 percent of Alaska's population:

- Handled 5.48 million tons of fuel and freight in 2024
- More than 80 percent of vans and containers shipped into Southcentral Alaska ports, some 1.68 million tons in 2024
- 2.60 million tons of refined petroleum products in 2024, plus another 1.04 million tons of refined petroleum products that flowed through port facilities via pipeline
- 107,641 tons of dry bulk freight in 2024, including about 80 percent of all cement used statewide
